PROFESSIONAL SUMMARY

Project and process professional with a BSc in Software Engineering, nearly three years of professional software development experience and four years in Canadian retail operations. Most recently a Business Process Consultant who moved a manufacturer's paper-and-whiteboard production process into a working workflow system, from staff interviews and scope documentation through phased delivery. Post-graduate training in project management, strong SQL and reporting skills, practical AI experience, and comfortable working between operations teams, managers and developers. Preparing for the IIBA ECBA certification.

CORE SKILLS

- **Project coordination:** scope and phased delivery planning, scheduling, risk and issue tracking, Agile/Scrum, Jira, Azure Boards, Trello
- **Business and process analysis:** requirements gathering, stakeholder interviews, process mapping (Visio), UAT support, defect tracking
- **Data and reporting:** SQL Server, Power BI / Power Query, Excel and Google Sheets dashboards, Python ETL, data reconciliation
- **Technical:** C# / ASP.NET Core, React, TypeScript, Angular, REST APIs, Azure DevOps; Claude, LLM APIs and RAG
- **People:** staff training, functional documentation, explaining system changes to non-technical teams

PROFESSIONAL EXPERIENCE

Business Process Consultant (Contract) — Coatings manufacturer (client confidential), Edmonton — Jul 2026 – Oct 2026

- Interviewed shop-floor staff to map the paper- and whiteboard-based order lifecycle and each role's day-to-day needs.
- Wrote scope documentation and a 15-week phased delivery plan with the project manager; validated each phase against agreed requirements before release.
- Translated production rules into a configurable workflow engine governing every order status transition (ASP.NET Core, React).
- Designed department-specific tablet screens and barcode-scanning steps, tested against real shop-floor scenarios; triaged issues and change impacts with the PM and a senior backend developer.

Paint Sales Associate (Full-Time) — The Home Depot Canada, Edmonton — Mar 2025 – Present

- Supported inventory preparation through count date, contributing to a district-leading shrink rate of about 1.47%, among the best in Canada.
- Previously Sales Associate and Head Cashier; now train every new associate in the department, cover supervisory duties, and completed the ASPIRE to Department Supervisor program.
- Read kitchen design layouts to prepare customer quotes and pricing; worked across Paint, Kitchen & Bath, Appliances, Service Desk, Front End, Seasonal and Hardware; Team Depot volunteer.

File Maintenance Clerk — Sobeys, Edmonton (*Produce Clerk, Dec 2022 – Dec 2024*) — Jan 2025 – Feb 2026

- Maintained store item and pricing records in the store system, reconciling discrepancies to keep shelf and system data accurate.
- Handled payroll and scheduling duties using Dayforce, working with confidential employee information under strict accuracy and privacy expectations; used the CAO system for receiving.

Web Developer, Project Lead — eBeyonds (Pvt) Ltd, Sri Lanka — Nov 2020 – Nov 2022

- Led and built production websites for international hotel brands (Kopster Hotels, Flemings Hotels, The Loren), integrated with the Amadeus booking system.
- Planned and ran feasibility meetings with project managers, business analysts and clients, and communicated updates and changes to all parties.
- Interviewed client staff to turn requirements into functional specifications; used SQL to investigate data issues and resolve defects.

Earlier: Trainee Software Engineer, H One (Power BI dashboards), 2020 · Software Engineer Intern, Spemai (fintech platform build), 2019

SELECTED PROJECTS

- **Retail Analytics Dashboard** — sales, regional performance and inventory-risk KPIs (Excel, Google Sheets).
- **Alberta Road Risk GIS System** — collision and weather data cleaned and scored into a filterable risk map.
- **Emergency Dispatch Simulation Dashboard** — real-time prioritisation, unit assignment and KPIs (SignalR).
- **AI Document Assistant (RAG)** — answers questions from uploaded documents with source citations.

EDUCATION AND CERTIFICATIONS

- **Post-Grad Certificate, Project Management & Professional Communications** — MacEwan University · 2024 (risk, cost, stakeholders, procurement, change management)
- **Post-Grad Certificate, Full-Stack Web Development & Professional Communications** — MacEwan University · 2023
- **BSc Software Engineering** — Cardiff Metropolitan University, UK · 2019 (WES-evaluated as a Canadian four-year bachelor's degree)
- **ECBA (Entry Certificate in Business Analysis), IIBA** — in progress
