PROFESSIONAL SUMMARY

Full-stack **.NET Developer** with 4+ years of experience building scalable enterprise applications, REST APIs, and data-driven systems. Strong expertise in **C#, ASP.NET Core, SQL Server, React/TypeScript**, and cloud-based development on Azure. Proven ability to design maintainable architectures, optimize backend performance, and deliver reliable solutions across the SDLC. Experienced in integrating complex datasets, supporting analytics workflows, and developing applications used in operational and decision-support environments.

TECHNICAL SKILLS

Languages: C#, ASP.NET Core, .NET Framework, JavaScript, TypeScript, SQL, Python

Frontend: React, TypeScript, Angular, HTML5, CSS3, SCSS, Bootstrap

Backend: REST APIs, ASP.NET Core Web API, Node.js, Express.js

Databases: SQL Server, PostgreSQL, MongoDB

Cloud & DevOps: Azure, Docker, Azure DevOps CI/CD, GitHub Actions

GIS: Leaflet, GeoJSON

Tools: Git, GitHub, GitLab, Visual Studio, Postman, Jira

Core Concepts: Object Oriented Programming (OOP), Design Patterns, SOLID Principles, SPA Architecture, Session Management, Web Security fundamentals, SDLC, Data Structures and Algorithms, Debugging, RDBMS, Problem Solving.

PROJECTS

Alberta Road Risk & Infrastructure Intelligence System

(React, TypeScript, ASP.NET Core Web API, SQL Server, Python, Leaflet (GIS))

- Built a full-stack GIS-enabled decision-support system for analyzing road incidents and infrastructure risks across Alberta.
- Developed **ASP.NET Core APIs**, SQL Server schemas, and React/TypeScript UI components supporting incident tracking, filtering, and reporting.
- Implemented **geospatial visualization** using Leaflet and GeoJSON to display high-risk zones and regional patterns.
- Created a Python ETL pipeline for data ingestion, validation, and normalization to support analytics and risk scoring.
- Designed a modular risk-scoring engine incorporating severity, frequency, weather, and proximity factors.

Emergency Dispatch Simulation Dashboard

(React, .NET Web API, SQL Server, SignalR)

- Developed backend services in **ASP.NET Core** for incident management, dispatch logic, and unit assignment workflows.
- Designed SQL Server schemas for incidents, EMS units, assignments, and audit logs.
- Implemented real-time updates with SignalR for unit status, KPIs, and dispatch events.
- Built a React dashboard for monitoring incidents, visualizing metrics, and supporting operational decision-making.
- Added lightweight AI-assisted incident analysis to recommend priority levels and unit types.

WORK EXPERIENCE

Web Developer

Colombo, Sri Lanka

eBeyonds (Pvt) Ltd | Nov 2020 - Dec 2022

- Developed and maintained enterprise-scale web applications and CMS-driven platforms for international hospitality clients.
- Built and integrated RESTful APIs to support communication between backend services, frontend applications, and third-party systems.
- Developed reusable frontend components using JavaScript, HTML, CSS, and modern responsive design practices.
- Collaborated with QA, business analysts, and product teams to deliver features across Agile sprint cycles.
- Investigated and resolved application defects, performance issues, and integration-related bugs across multiple environments.
- Participated in feature estimation, sprint planning, code reviews, and deployment coordination within Agile development teams.
- Implemented analytics tracking and SEO enhancements to support business reporting and customer engagement insights.
- Contributed to maintainable and scalable application development by following structured coding and testing practices.

Trainee Software Engineer

Colombo, Sri Lanka

H One (Pvt) Ltd. | Jan 2020 - Jun 2020

- Contributed to an internal enterprise dashboard built with **C# and Angular**, supporting reporting workflows across business units.

- Built a PowerApps-based mobile prototype for Sri Lankan Airlines, reducing manual steps during pilot testing.
- Assisted with feature development, testing, and deployments, improving release turnaround through structured SDLC practices.
- Supported **Azure DevOps CI/CD pipelines**, reducing manual deployment effort and configuration errors.
- Collaborated with stakeholders to translate business requirements into technical solutions and application enhancements.

Intern – Software Engineer

Colombo, Sri Lanka

[Spemai \(Pvt\) Ltd.](#) | Jun 2019 - Dec 2019

- Contributed to backend development for the OnePay digital wallet using **Python (Django)** and REST APIs.
- Designed and optimized SQL schemas and queries to ensure data integrity and performance.
- Participated in debugging, issue analysis, and cross-team communication to support stable releases.

Inventory Associate / Sales Associate (Part-time)

Edmonton, Alberta

[Home Depot](#) | Mar 2025 - Present

- Supported operational accuracy by identifying inventory discrepancies, contributing to a district-leading shrink rate (~1.47%).
- Performed cycle counts, investigated mismatches, and collaborated with teams to maintain accurate stock data.

EDUCATION

MACEWAN UNIVERSITY (Jan 2023 – Dec 2024)

Post-Graduate Certification in Project Management & Professional Communications | Edmonton, Alberta

Post-Graduate Certification in Full-Stack Web Development & Professional Communications | Edmonton, Alberta

CARDIFF METROPOLITAN UNIVERSITY (Sept 2016 – Nov 2019)

BSc (Hons) in Software Engineering | Wales, United Kingdom
